CAUTION: All drawings in this manual have been prepared based on the EA. The exterior design or component positions of other models may be different from what is indicated in the drawings, while the operation is the same.

OPENING YOUR SAFE FOR THE FIRST TIME

When first opening, users should open the safe with the emergency key. The operation in details refers to "opening the safe with the emergency key".

- Remove emergency lock cover, then insert the emergency key, and turn it counterclockwise.
- Turn the knob (master key) clockwise to open the door.

CAUTION: Finish operation, pull out the emergency key and keep it in a safe place.

INSERTING THE BATTERIES

- Open the door.
- Insert 4 X AA batteries into the battery compartment.
- Under normal condition, if both of the red and the green lights are on at the same time, it means the voltage is low and you should insert fresh batteries.

CAUTION: Replace 4 fresh batteries by lining them up in a manner as indicated by the "+", "-", and "-" signs. When outage for longer than thirty minutes, you should insert the user's code.

OPENING DOOR

- Input your user's code (3 to 8 digits), each pressing results one buzzer beep and yellow light flashes.
- Press the "OK" (yellow) button, the green light will be on.
- Press the "C" (red) button, the green light will be on.
- Press the "K" (master key) clockwise and just clockwise within 5 seconds, the door is opened.

CAUTION: The user reset code is "1557". Please input the user code again if the yellow light flashes with three buzzer beeps.

CLOSING DOOR

- Turn the knob (master key) counter clockwise to close the door.

AUTOMATIC LOCK

- 3 continuously wrong entries will activate the warning beep for 20 seconds.
- **The door has not been opened with the password, the next 2 continuously entries will be blocked.**
- **CAUTION:** The key could be blocked during this waiting. You can only stop the choice by opening the safe with emergency key and power-cut by removing the battery.

SETTING THE USER CODE

- With the door open, press the reset button one, start setting code when the yellow light goes on.
- Press the "OK" button, the yellow light will flash once.
- Confirm with 2 buzzer beeps, which indicates the acceptance and storage of the new code.
- When yellow light flashes with 3 buzzer beeps, which means the code changing is not effective, and you need to try again.

OPENING THE SAFE WITH THE EMERGENCY KEY

Upon first receipt of the safe, or either the electronic circuit malfunction or codes were wrong, you could use the emergency key to open the safe.

- Remove the emergency lock cover.
- Insert the emergency key, turn it counterclockwise, then turn the knob (master key) clockwise to open the door.
